computers & industrial engineering

Contents

Vol. 23, Nos 1–4, 1992

PROCEEDINGS OF THE 14th ANNUAL CONFERENCE ON COMPUTERS AND INDUSTRIAL ENGINEERING

DESIGN AND MANUFACTURING

Silvanus J. Udoka	1	The role of automatic identification (Auto ID) in the computer integrated manufacturing (CIM) architecture
Geoffrey Okogbaa, Jiansheng Huang and **Richard L. Shell**	7	Database design for predictive preventive maintenance system of automated manufacturing system
Hyeon H. Jo, Jian Dong and **Hamid R. Parsaei**	11	Design frameworks for concurrent engineering
Vivek Narayanan, Bopaya Bidanda and **Jacob Rubinovitz**	15	On the development of computer based path planning strategies for robotic spray glazing
Jian Dong, Hyeon H. Jo and **Hamid R. Parsaei**	19	An object-oriented window scheme for representing design and manufacturing activities
Julio Furtado and **Fulton T. Ray Jr.**	23	A rule-based part orientation system for fixtureless assembly
Sheikh Burhanuddin and **Sabah U. Randhawa**	27	A framework for integrating manufacturing process design and analysis
Steven H.-Y. Lai and **Bala Ram**	31	Feature based models for manufacturability assessment
Venkata Allada and **S. Anand**	37	Manufacturing applications of octrees
Chien-nan Huang and **Brian K. Lambert**	41	An integrated implementation for product design
Ali Bahrami and **Cihan H. Dagli**	45	Natural intelligence in design and manufacturing

CELLULAR MANUFACTURING

Jai V. Saboo and **Michael P. Deisenroth**	49	Graphical control of manufacturing work cells
Attahiru Sule Alfa, Mingyuan Chen and **Sunderesh S. Heragu**	55	Integrating the grouping and layout problems in cellular manufacturing systems
R. Meenakshi Sundaram and **Kiran Doshi**	59	Formation of part families to design cells with alternative routing considerations

Ming Liang and **S. Taboun**	63	Part selection and part assignment in flexible manufacturing systems with cellular layout
F. Amirahmadi and **F. Choobineh**	69	A heuristic grouping procedure for component family formation in a cellular manufacturing environment
Ali K. Kamrani and **Hamid R. Parsaei**	73	A methodology for forming manufacturing cells using manufacturing and design attributes
Rasaratnam Logendran	77	Simultaneous machine-part grouping approach in manufacturing cells
Gursel A. Suer	81	An algorithm to find the number of parallel stations for optimal cell scheduling
Ziv Barlach and **Kenneth R. Morrison**	85	Waiting time calculation for K machines with 2 service facilities
Taha Sidani, Yilmaz Cengeloglu and **Ali Sidani**	89	Inter/intra process communications in ISTS

NEURAL NETWORKS

Fred Y. Wu and **Kang K. Yen**	93	Applications of neural network in regression analysis
Godwin J. Udo	97	Neural networks applications in manufacturing processes
M. Tarek Gaber and **Colin O. Benjamin**	101	Classifying U.S. manufacturing plant locations using an artifical neural network
Chien-nan Huang, Chin-Choon Lim and **Ming C. Liu**	105	Comparison of image processing algorithms and neural networks in machine vision inspection
Kenneth R. Currie	109	An intelligent grouping algorithm for cellular manufacturing

PLANNING AND SCHEDULING

Rasaratnam Logendran	113	Group scheduling problem: key to flexible manufacturing systems
M. Gen, Y. Tsujimura and **K. Ida**	117	Method for solving multiobjective aggregate production planning problems with fuzzy parameters
Emanuel Melachrinoudis and **Michael Olafsson**	121	A scheduling system for supermarket cashiers
R. Meenakshi Sundaram and **Lester Blair**	125	Development of optimum scheduling strategies for test facilities
Jianxin Tang and **Wilfred V. Huang**	129	Hydrothermal scheduling problems with pumped-storage hydro plants
Naveen K. Velagapudi	133	Robust scheduling for manufacturing systems

T. L. Ward, P. A. S. Ralston and J. A. Davis	137	Fuzzy logic control of aggregate production planning
Jian Dong, Hyeon H. Jo and Hermid R. Parsaei	141	A feature-based dynamic process planning and scheduling
Gursel A. Suer and Zbigniew Czajkiewicz	145	A heuristic procedure to minimize number of tardy jobs and total tardiness in single machine scheduling
Gursel A. Suer and Cihan Dagli	149	Knowledge-based single machine scheduling
Celestine A. Ntuen, E. H. Park, Y.-M. Wang and William P. Byrd	153	The top architecture for multiagent task planning and scheduling
Mazin A. an-Najjar	157	Temporal aspects in FMS scheduling: an overview

QUALITY AND RELIABILITY

Y. E. Shao, G. Runger, W. A. Wallace, F. F. Kraft and R. N. Wright	161	Quality process modelling: an application to the continuous electrical resistance annealing of copper wire
Kyle Tolar and Richard G. Platt	165	MAG-EX: a magnetics fabrication expert system focusing expert systems technology on improving quality control
Baris Tan, Sencer Yeralan, Sailesh Babu and Brock Osborn	169	Computer aided reliability modeling and applications in semiconductor manufacturing
Azim Houshyar and David Lyth	173	A systematic supplier selection procedure
William Byrd, Celestine A. Ntuen and Eui H. Park	177	A computer-based model for system level reliability and maintainability allocation

FACILITY LAYOUT AND MATERIAL HANDLING

Steven H.-Y. Lai and Su-Hua Hsieh	181	On the design of AGV travel mechanisms
Tanya Smith and Sanjiv Sarin	187	A program for dispatching and routing AGVs
Toshihiro Minemura, Yoshio Hanzawa and Sourin Dutta	191	Planning facilities for elderly patients care examination room

HUMAN FACTORS

S. Deivanayagam	195	Designing for maintainability: computerized human models

Jenifer M. Sargeant, John E. Biegel and **Murat Draman**	197	Managing and interpreting student actions in an intelligent simulation training system
Bob White and **Joe Kaczmar**	201	Using computerized cinematography to develop a predictive model relating muscle stress and wrist movement
Peter J. McAlindon	205	Computer interface design: a user-centered approach
Pamela McCauley-Bell and **Adedeji B. Badiru**	209	A fuzzy linguistics model for job related injury risk assessment
Bruce D. Fischer and **Donald E. Fricker**	213	The use of voice mail software to monitor self-paced training programs
Norka Saldaña	215	DAS: a graphical computer tool for the collection of musculoskeletal discomfort information from the workforce

SIMULATION

Rodney L. Ward and **Wilfred V. Huang**	219	Simulation with object oriented programming
David W. Poock and **Kenneth R. Morrison**	223	Spreadsheet and dynamic schedule inputs to the SIMAN IV simulation language
Colin O. Benjamin, Lorace L. Massay, Manoon Sivapiromrat and **Hank Phillips**	229	A winning strategy for managing simulation projects
Ronald R. Mourant	233	An interface for hierarchical modeling in object-oriented simulation
Chiu-Chi Wei, Ali K. Kamrani and **Henry Wiebe**	237	Animated simulation of the robot process capability
Pravin S. Raj, William G. Nichols, Jay U. Sterling and **Gary P. Moynihan**	241	SM^2ILE: a heuristic simulation tool for strategic distribution planning
Avinash Waikar and **Manas Pattanaik**	245	Knowledge-based approach to simulation model validation
Jocelyn R. Drolet and **Marc Moreau**	249	Development of an object-oriented simulator for material handling system design
Kenneth R. Morrison and **David W. Poock**	253	Comparison of two simulation/animation tools for synchronous manufacturing
Kenneth R. Morrison	257	Application of concepts of networking animation models for synchronous assembly

Brian Jacobs, Kenneth R. Morrison and Charles W. White	261	Completely synchronous manufacturing for automotive assembly—some lessons learned
Christina R. Schian and Kenneth R. Morrison	267	Using simulation to improve synchronous flow in pinion manufacturing
Li Wen and Behnam Bahr	275	A simulation system for a surface climbing robot

MATHEMATICAL MODELING

Billy M. Maloney and Cerry M. Klein	279	Constrained multi-item inventory systems: an implicit approach
Louis Y. Tsui and Chia-Hao Chang	283	An optimal solution to a dock door assignment problem
Azim Houshyar and Bob White	287	Exact optimal solution for facility layout: deciding which pairs of locations should be adjacent
Hussein M. Saber and A. Ravindran	291	A partitioning gradient based (PGB) algorithm for solving nonlinear goal programming problems
S. M. Taboun and T. Ulger	295	Multi-objective modelling of operation-allocation problem in flexible manufacturing systems
Y. Nakahara, M. Sasaki and M. Gen	301	On the linear programming problems with interval coefficients
Y. Tsujimura, K. Ida and M. Gen	305	A parallel processing algorithm for nonlinear programming problems
Ajay Shukla, D. R. Sule and D. Furtado	309	A linear programming approach for optimizing the path of robot arm in an obstacle oriented work cell

HYPERMEDIA IN SUPPORT OF INDUSTRIAL ENGINEERING

Yasser A. Hosni and Andrew E. Okraski	313	Development procedure of a hypermedia application in support of industrial tasks

COMPUTER PROGRAMS AND SYSTEMS

Royal Dossett	319	Computer application of a natural-language predetermined motion time system
Chao-Yen Wu and Gordon P. Southard	323	A computer-based information system for clinical engineering in hospitals
Robert M. Cowdrick	327	Rightsizing your computer system—fundamentals and future directions

CONTROL SYSTEMS

Sencer Yeralan, Rolf Arrestam, Jan Holmlund and David J. Ramcharan	331	A fuzzy-logic control language for embedded controllers

Bala Ram and **Steven H.-Y. Lai**	335	The development of a program generator for programmable logic controllers
O. Geoffrey Okogbaa, Jiansheng Huang, Chiwei Chen, Tom Borkes and **James Moore**	341	Data management system development for on-line data acquisition and process control
Mohsen El Hafsi and **Sencer Yeralan**	345	Computer control system for a metal cutting machine
John E. Biegel and **Ralph V. Rogers**	349	Will simulation survive the arrival of intelligent control systems
Hongzheng Lu, Zhiyuan Ying and **T. Warren Liao**	351	Simulation of programmable logic controller

VISION AND DETECTION SYSTEMS

David B. Sieger and **Adedeji B. Badiru**	355	Real-time integrated model for visual perception and fuzzy control
Ehsan Asoudegi	357	Computerized dimensional inspection
Ehsan Asoudegi	361	Quantitative automated inspection of standard parts using machine vision

INTELLIGENT SYSTEMS

Abel Fernandez, John Biegel and **Jeff Earhart**	365	Expert system for IE student advisement
Noemi M. Paz, Peter McAlindon, Farnaz Ganjeizadeh and **William Leigh**	369	Graphical representation of help knowledge for intelligent tutoring systems
Namho Jung and **Taha Sidani**	375	Tutoring in a generic intelligent simulation training system
Lobna A. Okashah	377	Lewis Carroll's contributions to artificial intelligence

SUPPORT SYSTEMS

Shih-huai Huang and **Amy J. C. Trappey**	381	The integration of modular fixture database, fixturing knowledge base and 3-D fixture planning interface
A. S. M. Masud and **V. Sathyana**	385	A CAD-based layout planning procedure
Sabah U. Randhawa and **Thomas M. West**	389	Incorporating parameter variability in multi-attribute evaluation

Antony Satyadas and **H. C. Chen**	393	Multicriteria multigoal decision making—the fuzzy paradigm
Chao-Yen Wu, Francisco Irazusta and **James T. Lancaster**	397	A decision support system for college selection
Vinod Lall and **Joseph Stanislao**	401	Applying a coupled expert system to quality control charts
K. Srihari and **Martin Cala**	405	Knowledge based decision support for PCB assembly using SMT

BUSINESS DECISION SYSTEMS

Godwin J. Udo and **Silvanus J. Udoka**	409	Network management: a critical success factor for implementing computer-integrated manufacturing
Denise F. Jackson and **Thomas G. Greenwood**	413	An activity-based cost management system
Elin L. MacStravic and **Thomas O. Boucher**	417	A software for capital investment analysis in manufacturing
Kraig A. Downs and **Amy J. C. Trappey**	423	A sequential block approach to the design of a cost estimation system
John H. Manley	427	OTPM and the new manufacturing paradigm
R. Bruce Taylor and **Thomas M. West**	431	Development of a spreadsheet-based capital investment model with sensitivity analysis
R. Bruce Taylor	435	A schedule verification methodology utilizing simulation

APPLICATION

C. Chen, F. Swift and **R. Racine**	439	A computer application in apparel manufacturing management
Muzaffar A. Shaikh and **Behram J. Hansotia**	443	Minimization of drilling costs: a closed-form solution
John H. Ristroph, Ranganathan Muralidharan, Naresh Miglani, Kym Arcuri, Maurice Knight and **Cy Buchert**	447	Pollution prevention survey using microcomputers
John H. Ristroph, Jim Lee, Ranganathan Muralidharan, Mike McDaniel, Paul Templet and **Gus VonBodungen**	451	Air quality, industrial engineers, and computers
Sai Kolli and **Hamid R. Parsaei**	455	Multi-criteria analysis in the evaluation of advanced manufacturing technology using PROMETHEE

Kent E. Williams, John Deighan and **Tim Kotnour**	459	Knowledge acquisition for group problem solving
Marilyn K. Pelosi, Theresa M. Sandifer and **C. Edward Sandifer**	463	Color spreading algorithm for the retail industry
Luiz Steinberg and **Sencer Yeralan**	467	Industrial engineering support network for small manufacturers

POTPOURRI

Linga S. Ravindranath and **Ken A. Ebeling**	471	Distributed control of manufacturing cells
R. Martin Jones and **Timothy J. Greene**	475	Research and development of a method for determining strategic information needs of managers
Denise F. Jackson and **Kelechuku Okike**	479	Relational database management systems and industrial engineering
Janardan Kulkarni and **Hamid R. Parsaei**	483	Information resource matrix for production and intelligent manufacturing using genetic algorithm techniques
G. Allen Pugh	487	Selective assembly with components of dissimilar variance
Wade C. Driscoll	493	Finite queuing systems with gamma distributions
Steven M. Zimmerman, Warren Beatty and **Fred O'Rourke Jr.**	499	Better safe than sorry
Ganesh M. Krishnaswamy and **Ahmad K. Elshennawy**	503	Concurrent engineering deployment: an enhanced "customer product" approach
John Lew Cox and **Shari J. Seaton**	507	System integrators and implementers: the tools of choice have expanded since the Gilbreths and Tayor
Narasimha R. Mannur and **David M. Moreau**	511	An approach for development of reusable container system in large scale manufacturing
